## Abbamousses - Cleans and protects buildings

**Abbamousses** removes sustainably algae, moss and lichen on roofs and facades (building envelope). Abbamousses is sustained and prevents many years from a new occurrence of algae, moss and lichen. A visible effect occurs after 4 - 6 months. The end result will be reached after 12 - 18 months.

**Abbamousses** is biodegradable (up to 98%) and does not contain acids, sulfates and chlorine. Abbamousses is not dangerous for the adjacent vegetation and all metals and paints when used properly.

**Abbamousses** is prepared on the basis of quaternary ammonium salts in aqueous solution and should be applied in dry weather condition (+ 3 °C).

**Applications:** brick, fiber cement, gravel on flat roofs, concrete, exposed brickwork, all porous facade cladding, monuments, grave stones, porches etc.

In case of heavy contamination we recommend pretreatment with Abbaclean.

## Abbaclean - Cleans roofs and facades

**ABBAclean** is a product designed to clean walls and roofs which are encrusted with dirt and micro-organisms (moss, algae, lichens, red traces).

**Spray Abbaclean** and leave 4 – 24 hours. Then rinse off with a water system. For a long-term-protection, we recommend to apply Abbamousses.

## Abbasol - Cleans and protects porous exterior floorings

**Abbasol** cleans and provides a long term protection of all porous exterior floorings.

**Abbasol** is biodegradable (up to 98%) and does not contain acids, sulfates and chlorine. Abbamousses is not dangerous for the adjacent vegetation and all metals and paints when used properly.

**Abbasol** is prepared on the basis of cationic substances in aqueous solution and should be applied to the moistened surface.
